## Quality tells value in Diamonds

Quality determines the value of the Diamond—not price. Like gold, a Diamond has a standard of valuation through quality in color, cutting, perfection and weight.

Specks, cracks and other flaws not visible to the naked eye are behind the low prices so often advertised. An imperfect Diamond always "gives itself away" and brings humiliation—such are not good value at any price.

Be guided in buying Diamonds by the reputation of the store rather than price. Take no chances of being deceived.

We've been selling Diamonds right here in Detroit for fifty-nine years. This is a safe place to buy Diamonds—also a profitable place. Our long experience assures the knowledge of quality and where and when to buy. Comparison proves we give the best Diamond values in the west. We guarantee every Diamond we sell and we are always here to make the guarantee good.

Come here for Diamonds—you'll save money.

## Simple Way to End Dandruff

Stop Falling Hair and Itching Scalp.

There is one sure way that has never failed to remove dandruff at once, and that is to dissolve it. Then you destroy it entirely. To do this, just get about four ounces of plain common liquid soap from any drug store (this is all you will need) and mix it at night with a little water. Use enough to moisten the scalp. Rub it in gently with the finger tips. The rub is not to be done at night, but in the morning, most if not all, of your dandruff will be gone, and three or four more applications will completely destroy it, and make it never return. It is not a medicine, but a simple, safe, and entirely effective remedy. It is not a medicine, but a simple, safe, and entirely effective remedy.
