**"The preferred soft drink"  
among folks who really know**

THERE are many new soft drinks, but there's  
only one Buck—and only one Buck flavor. And say  
folks, you'll like it. It'll win you and hold you the first  
time you try a good, cold bottle.

Why is it preferred? Because Buck's taste comes from a  
different process of manufacture which makes it a rich,  
satisfying beverage; a raw grain drink can't taste like this.  
Judge Buck yourself; consult your palate; you'll want it often.
